Skills

Ruby	Rails
Javascript	HTML
Backbone	jQuery
CSS	heroku
SQL	git
TDD	

Projects

ProKeys (Rails, Backbone)

Web application for playing, customizing and recording music on your keyboard

- Web designs customized with advanced Javascript and CSS without Bootstrap
- Extensive use of Ajax in modal authentication for partial user access to content
- Advanced use of dynamic elements for custom drag-and-drop and preparing audios

TROLOLO (Rails, jQueryUI)

Collaboration and organization app based on Trello

- Rich user experience featuring intuitive drag-and-drop UI to reorganize card and items
- Advanced Backbone-on-Rails design patterns, including overriding parse methods to create Rails-like associations clientside

Zombie Smash (Javascript, HTML5)

Original shooting survival game written in Javascript

- Sprite based visual interface consuming Canvas 2D API
- Supports smooth animation and intuitive controls via Javascript engine

Gamehub (Rails, Backbone)

Video blogging website

- Enabled uploading and watching videos on site via Filepicker API
- Nested comments via polymorphic associations to normalize database

Experience

C2 Education Teacher (2015-2017)

- Instructed AP courses for Calculus, Statistics, Physics, Computer Science and every subject in SAT and ACT
- Active 3:1 student to teacher environment for highly individualized and communicative sessions

Focus Learning Private Math Teacher (2014-2015)

- Instructed variety of math subjects up to AP Calculus BC
- Acquired offers to return and for individual private tutoring

Education

Website Development App Academy (Fall 2014)

- Fullstack web development course — Acceptance rate < 5%
- Strong emphasis on code quality and design patterns

University of Southern California (2014)

BA Philosophy

- Two time Dean's List
- Member of USC Golden Key International Honor Society
